Infotouch Systems Profile

Introduction

Founded in 2003, Infotouch Systems Inc. (Infotouch) is an I.T. Solution Provider and Systems Integrator. With years of experience, Infotouch has been successful in providing services to the industry by enhancing I.T. facilities with the use of the most advanced and cutting-edge technologies at predictable operation expenses with the best support from certified engineers.

Vision

Enables everyone to be on worry-free and cutting-edge technology.

Mission

To continuously innovate and provide IT solutions through fast, efficient, reliable, secured, and scalable IT services in a predictable manner.

Our Team

Infotouch is composed of young and driven individuals who are proficient in providing I.T. solutions. Our team continuously hones their skills to keep up in today's pulse through persistent training and field experiences in collaboration with various companies.

Products and Services

Structured Cabling and Data Center

We Design and Build Structured Cabling for Copper, Fiber Optic, and GPON. We are certified designers and installers of our partners that ensures highest quality and performance of your network infrastructure.

Services we provide:

- Data Center Fit-Out and Network Design and Build
- Copper, Fiber and GPON Design and Build
- Optical Fiber Fusion Splicing and Testing
- Fluke Cabling Testing and Documentations
- FM200 and Novec Fire Suppression Systems
- UPS, Equipment Rack, Terminal Block
- Accredited by PCAB

Design and Fit-Out

We Design and Fit-Out commercial spaces with the fundamentals of functionality, attention to detail, and value creation. We ensure seamless integration of architectural and engineering service from pre-planning to project turnover. We have competent licensed architects and engineers who will propose professional cost-efficient ideas and code compliant solutions in-line with the client's requirements.

We provide Design and Implementation for the following:

- Architectural Interior
- Electrical
- Mechanical
- Fire Pro
- Structural
- Sanitary

Security and Access Control

We Design and Build security systems that are integrated and customized for your needs. We also custom develop software to integrate and automate. We have already installed in different industries such as steel mills, hundreds of retail stores, offices of various sizes, buildings, and more. Below are some of our partners

Products we provide:

- CCTV IP Camera with or without Analytics
- Biometric Devices such as Fingerprint and Face ID
- RFID Devices and RFID Access Cards
- Network Video Recorders Storage Management
- Design and Build of Command Center

Network Management and I.T. Support

We Design, Build, and Operate Network Infrastructures that are scalable, reliable and secured. Equipped with Network Operation Center and with our Professional Network Engineers, we are able to detect and react to outages that allows us to get the operations up and running as fast as possible.

Services we provide:

- On-Site Technical Support and Network Engineers
- 24x7 Servers and Network Operations Monitoring
- I.T. Asset Management
- Security and Password Management
- 24x7 Remote I.T. Support and Helpdesk

Cloud Solutions

We Design and Host applications over the cloud to enable our customers to take advantage of scalable, reliable, secured access, anytime and anywhere to their applications. This is especially important to customers who needs their applications to be accessible by its users as fast as possible and be able to scale immediately when needed. Below are our partners:

Microsoft Azure

G Suite

Office 365

Services we provide:

- Design Hybrid and/or Pure Cloud Solutions
- Migration of Applications and Servers to Cloud
- Server Sizing and Capacity Planning
- Cloud Management and Monitoring
- Web and Email Hosting
- I.T. Support for Cloud Services

Software Development

We Design and Build software for specialized industries to improve its back office operations and make it more accessible to their partners and clients. We also create middleware to interconnect different systems and make it integrated.

RaspberryPi

Solutions we provide:

- Middleware for Equities Trading Systems
- Online Facility for Equities Trading System
- Android and IOS Mobile Developments
- Microsoft .Net Technologies
- MSSQL, MySQL and NoSql Databases
- Raspberry PI and Arduino

General Supplies

Our wide range partners allows us to supply and delivery general products that you may need.

Customers

Our clients and partners include some of the top multi-national companies here and abroad, as well as technical specialists, financial institutions and government bodies.

Our long-term financial strength depends on building sustainable relationships with our clients, partners, and stakeholders. To do this we act with integrity and deliver on our promises.

Working collaboratively is integral to achieving the best outcomes. We have created enduring relationships with clients, partners, and stakeholders across the sectors in which we operate.

Infotouch aspires to be an industry leader in Alliance Contracts and continues to-be selected for the infrastructure partner in the Philippines.
